

JUNIOR ENGINEER

OVERVIEW:

Harvey Tool is a growing company! We're looking for a motivated person for a Junior Engineer position. This is a full-time, entry-level opportunity for a recent college graduate.

A Junior Engineer at Harvey Tool would assist customers with milling applications. Because this is an entry-level position, Harvey Tool expects to provide training and coaching to the right person. A machining background would be beneficial but is not necessary to be considered for this position.

Harvey Tool maintains a clean, friendly office environment.

EDUCATION, EXPERIENCE AND SKILLS:

- Ideal candidate would have a Bachelors Degree in Mechanical Engineering (or related field)
- Basic understanding of Metal working milling applications
- Comfortable with Excel & Word
- Excellent written and verbal communication skills
- Flexibility and desire to take on additional responsibilities
- Ability to multi-task while maintaining attention to detail and deadlines
- Energetic, friendly, outgoing, proactive personality
- Willing to learn and grow with the company

NEXT STEPS:

Qualified applicants should respond via email to careers@harveytool.com.

Responses to this opportunity must have "Junior Engineer" as the email subject heading.

Responses to this opportunity must include a cover letter and resume.
